Call for Papers:
Special Issue of *Electronic Publishing: Origination, Dissemination and Design* on Active Documents

Electronic Publishing: Origination, Dissemination and Design (EP-odd) is pleased to announce a special issue on the topic of Active Documents, planned to appear in 1993.

The presentation and contents of an active document are dependent on computation. An active document can be intended for interactive presentation or for paper presentation. A paper-based active document's content might be generated by execution of an algorithm when the document is assembled. The organization of an interactive active document might depend on characteristics of

the computer environment in which it is displayed. In either case, the key characteristics are that the document has been designed by an author with a particular purpose in mind and that the document's content and/or structure responds to aspects of the surrounding world's state.

We are interested in papers on all aspects of active documents. As a very general starting point, some possible topics include system design, underlying support issues, evaluation, language issues (especially the representation of the activity within the system), and cognitive issues.

As a rough guideline, papers should be in the range of 10 to 20 pages in length, although longer and shorter papers are appropriate if dictated by the subject matter. All papers will be refereed using the normal *EP-odd* refereeing process. Manuscripts must be submitted in final form as the limited time available for reviewing the contributions to the special issue will not permit very many passes through the editing cycle. Authors will be asked to follow the *EP-odd* author guidelines, (four copies of the manuscript are requested), and they are asked to include a copy of the *EP-odd* copyright release form with their submission. Copies of the guidelines and copyright release form may be found in each issue of *EP-odd* or may be obtained by mail from the guest editor (address below).

Because space is limited in the special issue, it may not be possible to publish all deserving papers. Unless authors request otherwise, such deserving papers will be referred to the normal *EP-odd* editorial process and will be considered for publication in a subsequent issue.

This issue will be coordinated by Vincent Quint, member of the editorial board of *EP-odd*. He may be contacted at:

Vincent Quint

 France
 e-mail: quint@imag.fr
 Telephone: +33 76 63 48 31
 Fax: +33 76 54 76 15

In order to receive maximum consideration, papers should be received by

April 1, 1993

Papers received after this date will be accepted, but because of schedule constraints may not be able to appear in the special issue.
